What's New in the iPhoneXdrive?

iPhoneXdrive lets you transfer files from your iPhone to your computer with several simple steps, and you can use the software to perform the transfers instantly. The files that you manage are stored to your computer in a manner that works like a USB memory stick. How to Transfer Files from iPhone to Computer: You can use the software in a number of ways, but you should at least know some things about how to transfer files from an iPhone to your computer. The first thing you need to do is to plug your iPhone to your PC. You will need to have Windows 8.1 or Windows 10, and you'll have to install the software. If it is not pre-installed on your system, then you will have to download it. You will need to ensure that your iPhone is connected to your PC, as the iPhoneXdrive app can only act as a file transfer tool. Moreover, you will also have to select the type of iPhone that you own, as this program will allow you to scan for the appropriate model of the device. If your iPhone uses the Lightning connector, then it has to be connected to the PC via that cable. You will also need to go to the Settings screen of your iPhone to open the phone's File Transfer option. You can also use the 'Share' options that you have on your device. In fact, this function will offer you to set up a connection between your iPhone and a PC in order to send data to the target system. How to Transfer Files from PC to iPhone: From now on, you need to install iPhoneXdrive on your Windows system. In fact, you will have to start the software on the same PC you have your iPhone on. You need to make sure that you have both the file utility and the app installed and running on your target system. The iOS 8.x iPhoneXdrive version will look very similar to the Windows version. This means that you need to install the app and then launch it to access the iPhone file manager. It is very likely you will be presented with the interface looking like this: iPhoneXdrive Setup The interface resembles that of a typical file manager. You will find here folders, some with sub-folders, pictures, and other items. The software is really simple. It can be used on any Apple-based mobile device. In fact, you can use it to transfer files from an iPhone 7, iPhone 6S, iPhone SE, iPad, iPod
